KWAN YONG CONSTRUCTION PTE LTD

Safety and productivity

go hand-in-hand

+† A safe work environment does not compromise but complements work progress. **+†**

Tang Siew Tuck
General Manager
Kwan Yong Construction Pte Ltd
bizSAFE STAR

Kwan Yong Construction Pte Ltd is a recipient of the bizSAFE Enterprise Exemplary Award in 2016.

Kwan Yong Construction Pte Ltd firmly believes that “accidents at work don’t just happen”; they can be prevented by raising employees’ awareness of workplace safety and health (WSH) and implementing a robust and effective WSH management system.

Recognising that employees are valuable to the company, Kwan Yong strives to provide a safe and healthy workplace for all. By emphasising on training and education, it aims to equip employees with WSH knowledge and skills necessary to make safe and informed decisions.

The company is committed to build a preventive WSH culture. It implements “Design for Safety” to proactively ensure that WSH risks are addressed early during the design and planning stage of a project. On top of that, it has introduced various initiatives to ensure that both management and employees manage risks proactively. Some initiatives implemented by top management include chairing regular corporate safety meetings, conducting regular workplace inspections and following up on measures for issues reported or identified. During coordination meetings, employees discuss potential hazards arising from work activities and brainstorm ideas to improve work processes.

Its uncompromising stance on WSH has helped Kwan Yong achieve greater work productivity and timely delivery of projects. In 2015, the company completed the construction of two new school projects. Moving forward, it aims to help its partners join the bizSAFE community and spread the message that WSH and productivity go hand-in-hand. **•**

Workplace safety and health

is key to business success

+† Our fundamental rationale for workplace safety and health management is simple — We care for the safety, health and wellbeing of our people. **+†**

Roger Heng
Managing Director
LSK Engineering (S) Pte Ltd
bizSAFE STAR

LSK Engineering (S) Pte Ltd is a recipient of the bizSAFE Enterprise Exemplary Award in 2016.

Workplace safety and health (WSH) is an integral part of LSK Engineering (S) Pte Ltd’s business operations. The company recognises that good WSH practices lead to higher profitability and productivity, and give the business a competitive advantage. Guided by its belief that “Workplace accidents are preventable and therefore, unacceptable”, LSK Engineering aims to cultivate good WSH practices and a positive WSH culture in all its employees.

The company has embarked on various WSH culture-building efforts to overcome language and cultural barriers that exist within its diverse workforce. Focus group and training sessions were conducted in native languages while activity-based campaigns were organised. These efforts helped foster an inclusive, supportive work environment and ensure that all employees are aligned with LSK Engineering’s WSH values.

Due to the nature of LSK Engineering’s work in the mechanical and electrical engineering service industry, its employees are exposed to electrical hazards at project sites. One of LSK Engineering’s initiatives to eliminate the risk of electrocution is its investment and use of thermal imaging tools. Thermal imaging helps uncover hot spots caused by defects in connections and components. With thermal imaging tools, employees can identify dangerous hot connections in early stages of degeneration so preventive action can be taken.

The company credits the bizSAFE programme for helping it achieve zero accidents at its workplace and project sites year after year. Having reaped the benefits of implementing bizSAFE, LSK Engineering urges contractors to obtain bizSAFE Level 3 certification and improve their risk management. **•**
